

EmployeeConnect
Work. Flow. Smarter.

Employee User Manual

A manual designed to help individuals use CIRRUS

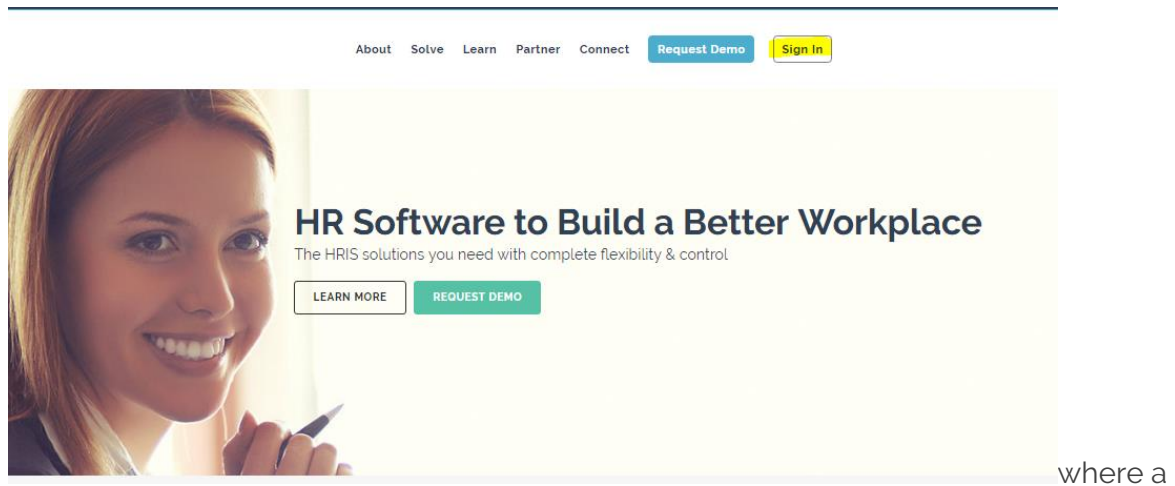

Cirrus – An Introduction

This manual is designed to help individuals use the EmployeeConnect Cirrus product. Cirrus is the first tier of the EmployeeConnect HR3 suite of products and gives a base use of core HR self-service functionality.

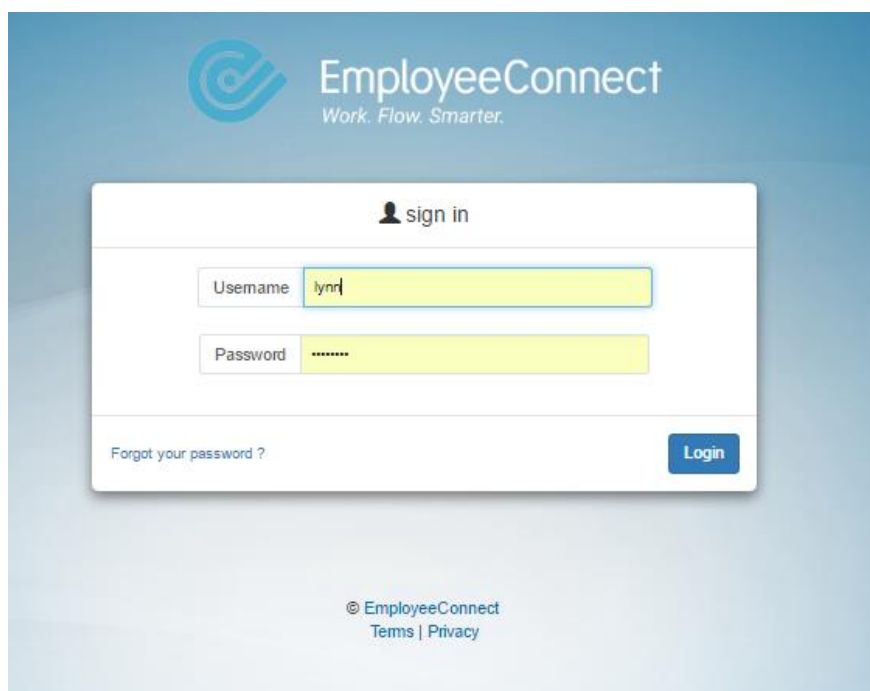

Cirrus uses the same basic principles as in all other EmployeeConnect products of workflow and security group access. Information contained within Cirrus is generally initially provided via integration with the organisation's payroll system and updated on a regular basis. However, once the initial data load occurs, it is recommended that employees take ownership of their personal data and keep it up to date themselves.

Accessing Cirrus

To access Cirrus, go to www.employeeconnect.com and click on the Sign In button

The login screen will be displayed.

Individuals enter the username and password they have been provided to access the Cirrus database.

Initially, individuals will have a username and a password assigned. The username will typically be their company email address (eg. craig@datakiosk.com.au), but for companies that do not use email, the username will be the CompanyID.Employeeel (eg. datakiosk.1047).

If an individual cannot remember their password, they can click on the *Forgot your password link*. This takes the user to a different screen where they enter either their username or email address. A temporary password is then sent to the email address stored within the system. The temporary password must be used within 1 hour of being issued.

An individual can also contact their system administrator to be issued a password. Any passwords issued by an administrator can be viewed by administrators whilst passwords generated by individuals through the system are encrypted so that administrators cannot see them.

Once an individual has successfully logged in using the temporary login password, they will be directed to create a new password. They will need to confirm the new password and this new password will then be used to access Cirrus and is encrypted.

To change the language used throughout Cirrus, please select the language preferred from the list provided in the Preferences under Settings on the Home menu.

Navigation of Cirrus

Once an individual has successfully logged in, a page will be displayed with a number of links on the Top menu. The links will differ depending upon the individual's access level. Access levels are defined by the system administrator and are as follows:

Employee: is defined as an individual only responsible for their own data

Manager: this is defined as an individual that has others reporting directly to them

Admin: this is defined as an individual that can see and maintain user information for the entire organisation

Guest: a person that has demo access can see all the same information as Admin but without the updateable capability

Sysadmin: this is defined as an individual that can see and maintain user information for the entire organisation as well as the configuration of the system

Superuser: these people have access to all areas of the entire system
(EmployeeConnect consultants)

The Cirrus screen has a side menu and a top menu to navigate through the system with the remaining information displayed within panels on the main portion of the screen after selecting any menu option.

The Home Page has a number of Tabs with direct links to the most commonly used areas of the system

User Top Menu

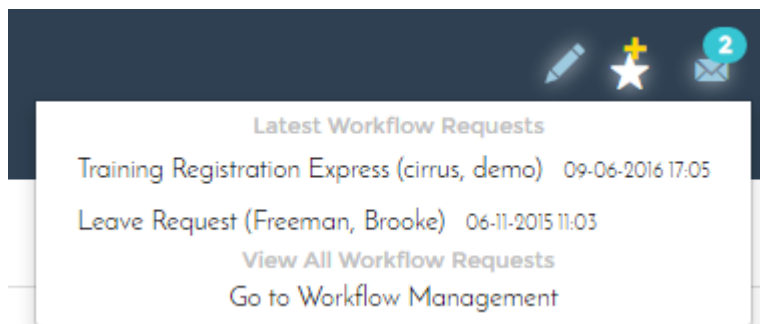

The user top menu appears on the top of your screen and shows the currently logged in individual's name.

If a photo has been uploaded via the preferences link, it will appear next to the User's name.

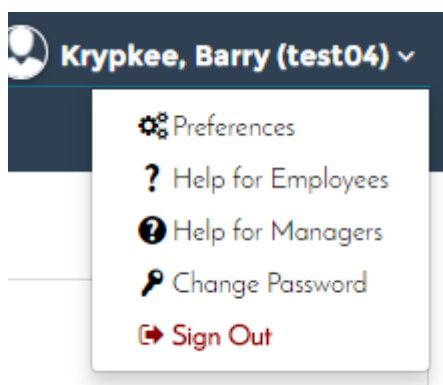

The Favourites link (star) will display your list of saved favourite links.

The Workflow links (envelope) will display the most recent workflow requests with a link direct to your workflow Inbox

Click on the Star + icon to add the currently displayed page to your favourites,

Clicking on the Down Arrow next to your name will present the following options:

Preferences – select your options and upload a photo.

The Help links give you access to the User manuals.

Change Password – a link enabling you to change your password.

To logout of the system, click on the red Sign Out link.

On the left of the top menu, the company logo should also appear.

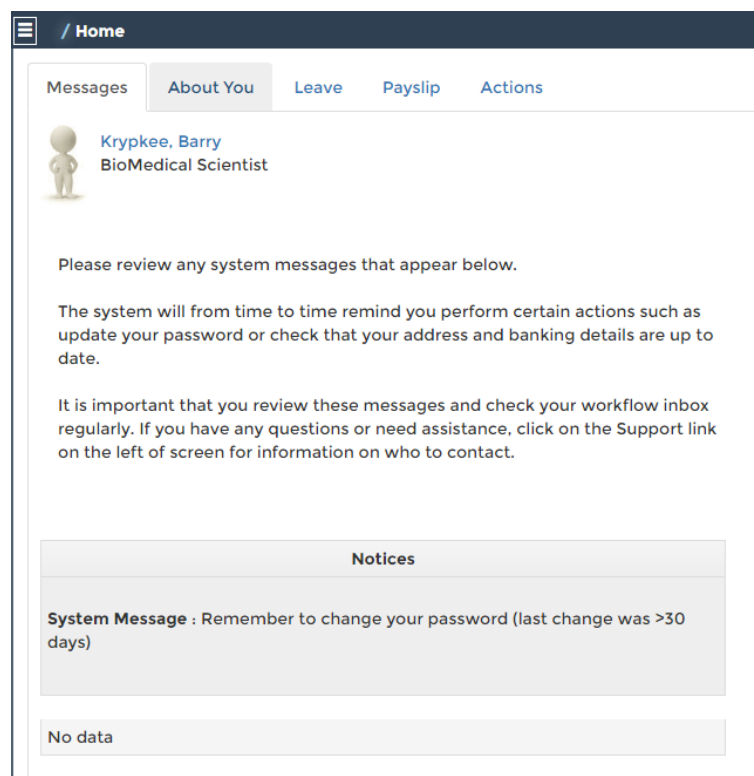

The Top menu also contains links to various parts of the system depending on your allocated security level and modules.

The  will Show/Hide the left menu tree

Using the Home Page Tab links

The Home link will refresh the Home page.

The Home Page displays any relevant messages for the individual as the first of the 5 panels and also gives easy access to the most commonly requested information and links for an individual.

Messages

This panel displays messages relating to Workflow activities requiring your attention, any questionnaires that are required to be completed and advises any delegations that might be assigned to you.

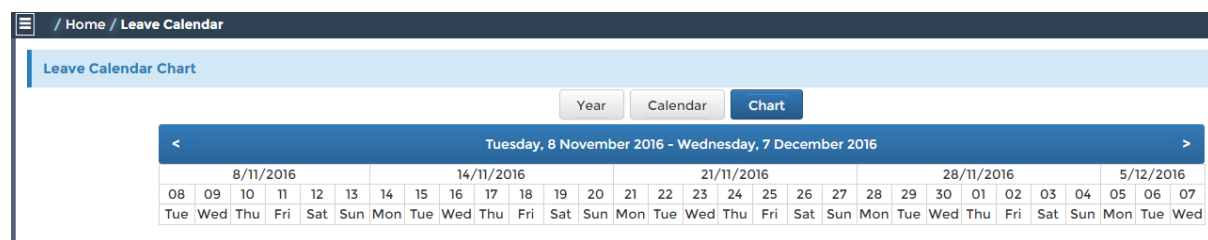

About You

This panel displays the information currently held in the system relating to your directory and personal information with the ability to request a change to the displayed data. Submitting a change request will initiate a workflow process and changes will only be applied after approval by an administrator.

Leave

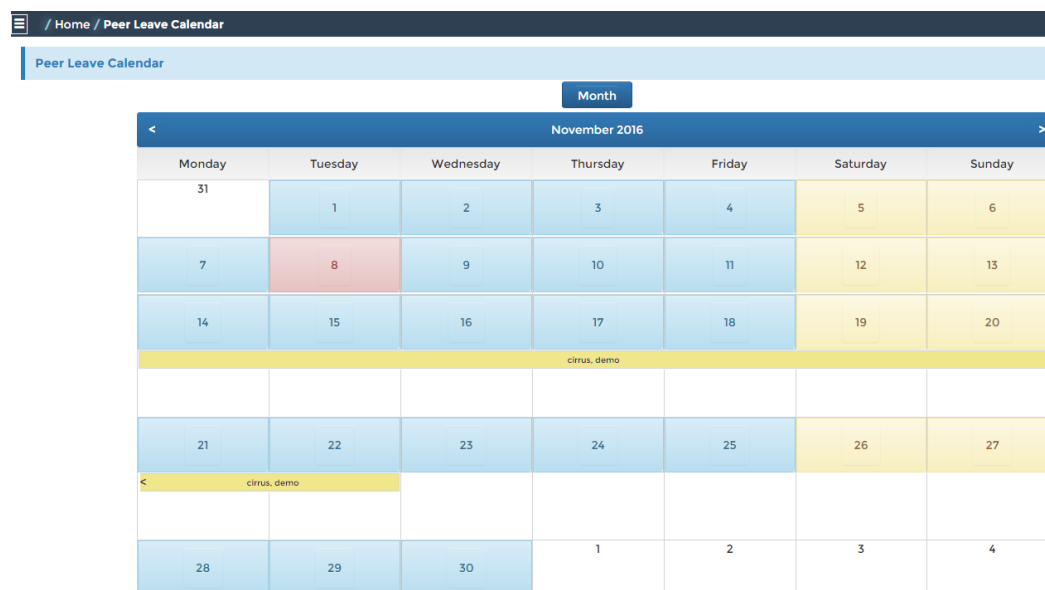

This panel will display the most recent leave balance information transferred from the payroll system as well as a link to apply for leave and the ability to view any upcoming leave in a calendar format.

Through the leave request panel, individuals also have access to leave calendars and charts showing the requested, approved or processed leave requests for themselves and also their Peers.

You can hover your mouse over the entry to view the complete details of the request.

You can also view the Peer leave calendar by the month.

To view a month or week, past or future, click the arrows or options on the top of the chart/calendar

Payslip

This panel will display a link to your most recent pay slip information transferred from payroll and the ability to also view and print historical pay slips.

The payslip panel will display the individual's most recent payslip as provided by the payroll integration.

 [View / Print Payslip](#)
View and/or print your most recent payslip

Pay Advice

Pay Advice No.:no data

Pay Date:

Period End Date:

Tax Code:

Pay Rate:

Annual Pay:

Item	Current	YTD
no data	\$	\$

 [View Payslip History](#)
View all your payslips held in the system

Payslip History

Payslips are uploaded by the payroll integration and a history is maintained within Cirrus. To view previous payslips, select the period end date from the list provided. The pay advice layout is the same for all payroll systems. The data is provided by the payroll system and then formatted for a Cirrus layout.

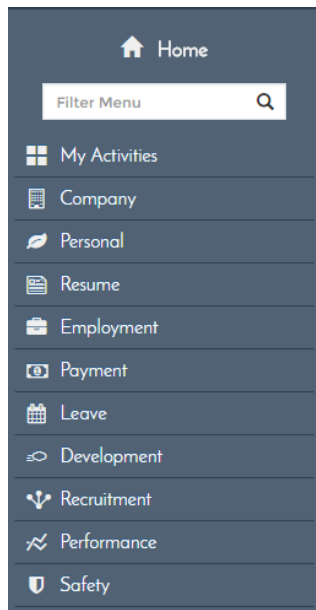

To print a hard copy of the payslip, click the *Print* button to the left of the required pay date to display the data and then use your browser's print function.

Actions

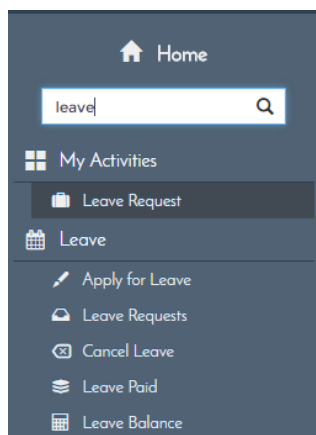

This panel will display any actions you need to deal with e.g. timesheet approvals – this will only apply if a manager has delegated their workflow or team to you.

Using Home Menu Links

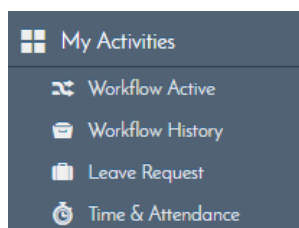

There is a search facility for the menu at the top:

Entering a word (e.g.leave) and searching will display any menu links containing that word as per the following example.

My Activities

Links are available here to current workflow items as well as workflow history along with a link to submit a Leave Request and a link to enter a timesheet.

Workflow Active & History

This link will give you a listing of all workflow items you have submitted and their current status.

Leave Request

All individuals have the availability to enter a leave request. To enter a leave request, complete the details and click the *Save* button. The leave request record will then be available for approval on the manager's workflow screen.

Sunday 2016-11-13	☐											

Select Date: Add

Leave Requests: not found during this period

Select the correct pay period from the Period list.

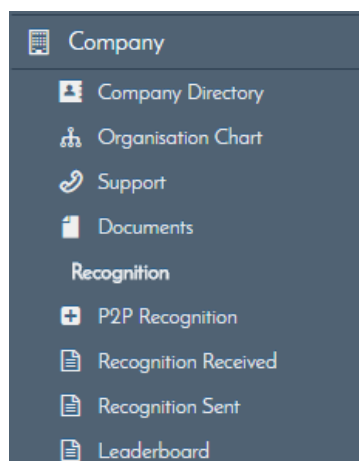

Tick Apply Standard Hours if you want the timesheet prepopulated based on your work group definition daily hours.

Pay Rate, Allowance, Job Cost Code and Leave list values are determined by your system administrator.

To add an additional entry for any given day, use the Select Date and Add buttons on the bottom of the timesheet.

You may Save the timesheet and return to add to it as many times as you like. However, once you flag 'Commit' it will no longer be available to edit and it will be with your manager for approval.

Company

Company Directory

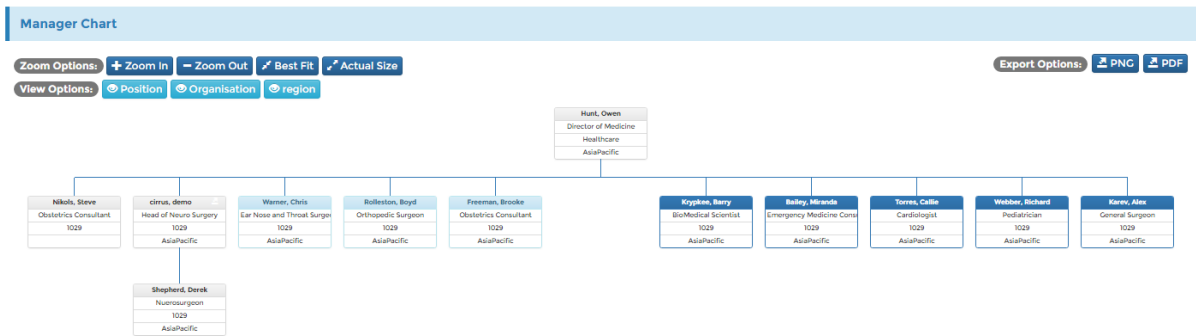

All individuals have access to the company directory link. When clicked, this gives a report of all individuals within the organisation and their work contact details.

Company Directory									
Search Clear Advanced xls									
Email Starts with 'test'									
ID	Name	Chart	Email	Phone	Mobile	On Leave	Position	Manager	Active
test05	Bailey, Miranda		test@datakiosk.com				Emergency Medicine Consultant	Hunt, Owen	
democirrus	cirrus, demo		test@datakiosk.com				Head of Neuro Surgery	Hunt, Owen	
test03	Freeman, Brooke		test@datakiosk.com				Obstetrics Consultant	Hunt, Owen	
test10	Karev, Alex		test@datakiosk.com				General Surgeon	Hunt, Owen	
test04	Krypkee, Barry		test@datakiosk.com				BioMedical Scientist	Hunt, Owen	
test02	Rolleston, Boyd		test@datakiosk.com				Orthopedic Surgeon	Hunt, Owen	
test06	Shepherd, Derek		test@datakiosk.com				Nuerosurgeon	cirrus, demo	
test07	Torres, Callie		test@datakiosk.com				Cardiologist	Hunt, Owen	
test01	Warner, Chris		test@datakiosk.com				Ear Nose and Throat Surgeon	Hunt, Owen	
test09	Webber, Richard		test@datakiosk.com				Pediatrician	Hunt, Owen	

You can also search by a specific column by selecting search criteria from the list available at the top of the report. In addition, the data can be downloaded to an excel spreadsheet by clicking the *XLS* button. To sort by a particular column, click the column name at the top of the report.

Organisation Chart

This link will display the organisation chart including Positions, Org Units, Region & incumbents:

There are Zoom, View and export options available to enable your requirements to be best met.

Support

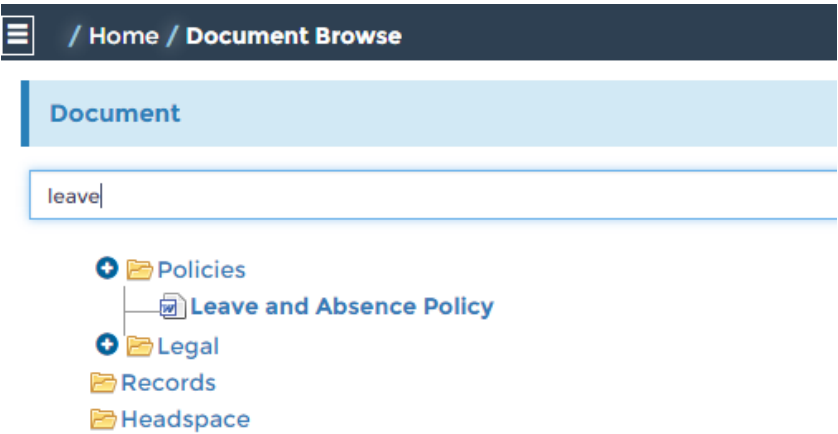

This link will display the contact information of the system support person entered by the administrator of the Cirrus system for your organisation

Documents

This link will give you access to all published documents e.g. company policies

Filter

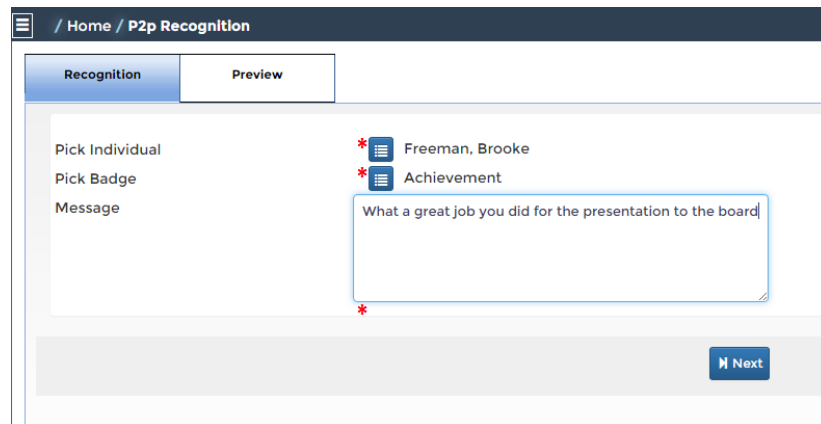

Entering a word (e.g.leave) and searching will display any document links containing that word.

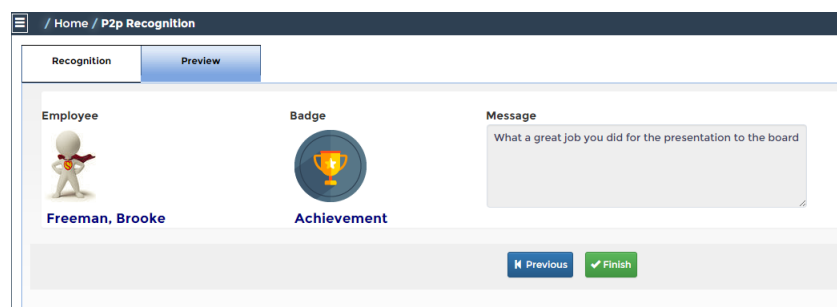

Recognition

P2P Recognition

This link gives you the ability to assign an achievement, recognition or service award to anyone of your peers.

The screenshot shows the 'P2P Recognition' form with the 'Recognition' tab selected. The form has three sections: 'Pick Individual', 'Pick Badge', and 'Message'. The 'Pick Individual' section shows 'Freeman, Brooke' with a red asterisk. The 'Pick Badge' section shows 'Achievement' with a red asterisk. The 'Message' section contains the text 'What a great job you did for the presentation to the board'. A 'Next' button is located at the bottom right of the form.

The screenshot shows the 'P2P Recognition' form with the 'Preview' tab selected. The form displays the selected individual 'Freeman, Brooke' with a small icon, the selected badge 'Achievement' with a trophy icon, and the message 'What a great job you did for the presentation to the board'. At the bottom, there are 'Previous' and 'Finish' buttons.

The Pick Badge link will display a list of currently available badges that you can assign to your peers. These include service, qualities, objectives, skills and attitudes that might assist in the overall development of the individual. Each badge has an allocated number of points which can be potentially used to earn a given reward when a specified target is reached by an individual.

Recognition received

This link gives you the ability to view any achievement awards that have been assigned to you by your peers

Recognition Sent

This link gives you the ability to view the achievement awards that you have assigned to your peers

Leaderboard

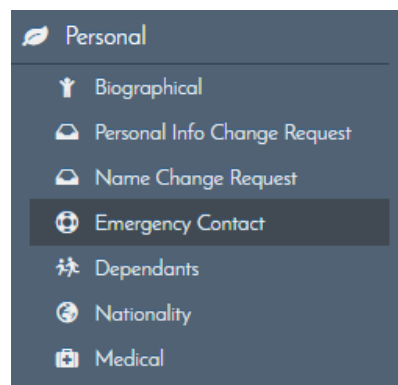

This link displays a summary list of employees with the number of awards that have been assigned as well as their current points tally.

Personal

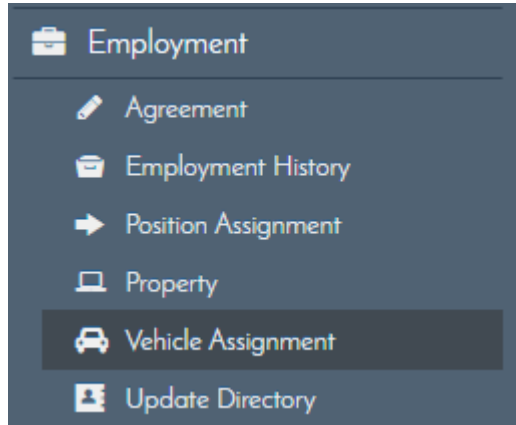

Use the various links to update your biographical information such as address or emergency contacts. The Personal Info Change Request & the Name Change Request form will generate a workflow process requiring validation before the system is actually updated when submitted..

Resume

Use the various links to update your resume information such as languages, licences and prior work experience.

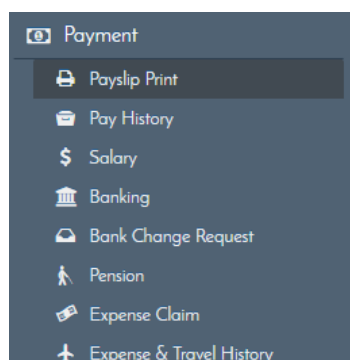

Employment

The various links enable you to view your current and historical employment details as well as any property or vehicles that have been assigned to you. This section is originally populated with information transferred from the payroll system. Individuals cannot update this information but only view it. The work details are kept up to date by admin and through an integration with the payroll system.

The Update Directory link gives you the ability to add additional phone & mobile numbers only.

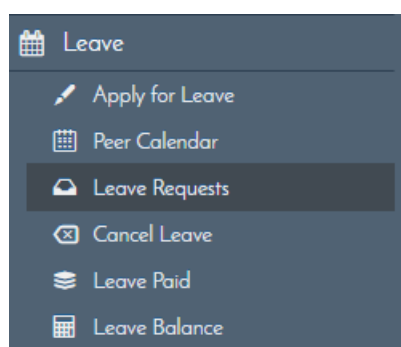

Payment

Use the various links to view and print pay slips as well as entering expense and travel requests.

The ability to inform payroll of how an individual would like pays disbursed is also provided through the Bank Change Request link. Enter in the bank account information for up to 5 accounts and click the *Save* button to save the changes. This information will now appear on the main screen. The changes made within this screen do not automatically update payroll, however, the administrator has the ability to download all changes to a spreadsheet to enable a manual upload into payroll. If you require international account information to be entered, you will need to advise your HR Administrator so they can enter the information on your behalf.

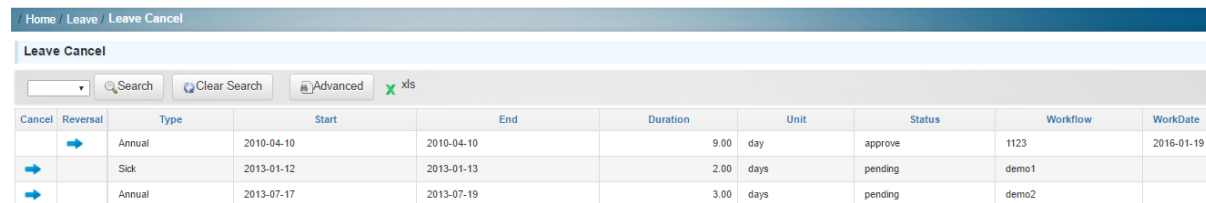

Leave

Use the various links to apply for or cancel leave requests and to view your leave balances and history. There is also a Peer Leave calendar which will enable you to view your peers' current leave requests. The Apply for Leave link is the same as that previously described under My Activities.

Cancel Leave

To Cancel a Leave request, click on the Leave Cancel Icon and a list of all your leave requests will be displayed.

Home / Leave / Leave Cancel									
Leave Cancel									
Search Clear Search Advanced Xls									
Cancel	Reversal	Type	Start	End	Duration	Unit	Status	Workflow	WorkDate
	→	Annual	2010-04-10	2010-04-10	9.00	day	approve	1123	2016-01-19
→		Sick	2013-01-12	2013-01-13	2.00	days	pending	demo1	
→		Annual	2013-07-17	2013-07-19	3.00	days	pending	demo2	

Any Leave Request workflow which has not yet been completed will have a cancel icon available for you to select. When you click on the icon and then save the displayed record it will be cancelled.

Any Leave Request workflow which has been completed will have a reversal icon available for you to select. When you click on the icon the original request will be displayed with a requirement to enter a reason for the reversal. Once you save this entry, a new workflow process will be generated effectively creating the reversing entry to be approved and transferred to payroll.

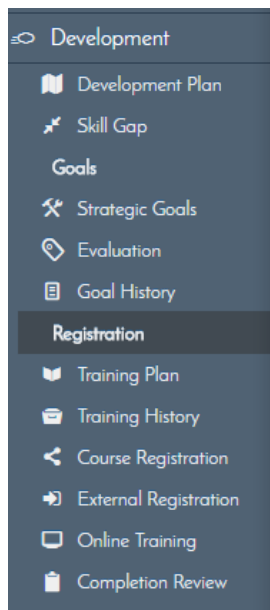

Leave Paid

The Leave paid link will display all the leave that has been processed by payroll to date.

Leave Balance

This link will display your leave balances as per the latest received data from payroll. Please make note of the date.

Development

Use the various links to view and manage the assigned requirements of your development plan.

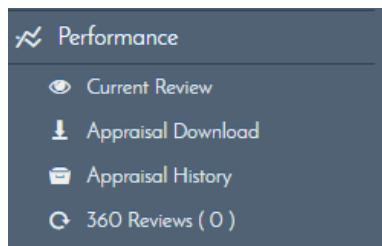

These links include the ability to register for a required learning activity either internally scheduled or as an external course or activity and also any online training that might be available.

Recruitment

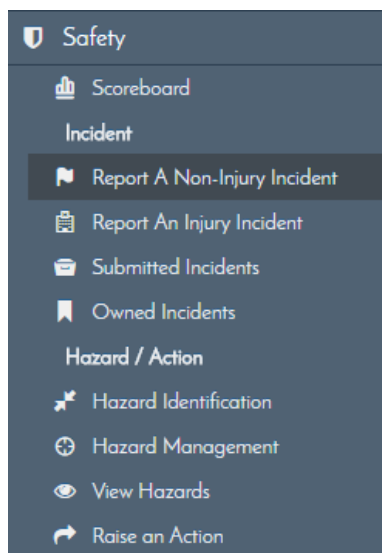

The recruitment links will keep you informed of any career opportunities available and also the ability to refer someone for a vacant position. If you do apply for any internal career opportunities they will be displayed from the My Applications link.

Performance

Use the various links to complete your current Performance Review if you have been assigned one as well as view any historical reviews.

Safety

Use the various links to report incidents and hazards as well as raise actions if required

The scoreboard will give you a snapshot view of the current OHS statistics based on a rolling 12 months.

Applying Filters in Reports

The Advanced search is used to apply multiple filters on any given report.

The screenshot shows the 'Advanced Search' dialog box. At the top, there are buttons for 'Apply Search', 'Reset', and 'Clear Search'. Below these, the 'Statement' section shows a filter chain: 'Location Equal Sydney' followed by 'And' and 'OrgUnit Equal Administration'. The 'Set Filtering Conditions' section has radio buttons for 'And' (selected) and 'Or'. It contains three filter rows, each with a field dropdown, an operator dropdown (all set to 'Equal'), and a value dropdown. The first row has 'Location' as the field and 'Sydney' as the value. The second row has 'OrgUnit' as the field and 'Administration' as the value. The third row has empty dropdowns. To the right of each row is a 'Delete' button. An 'Add' button is at the bottom right of this section. The 'Set Visible Columns' section at the bottom lists various fields with checkboxes: First Name, Last Name, Position ID, Location ID, Location, OrgUnit ID, OrgUnit, Region ID, Region, Company ID, Manager ID, and Manager. The checkboxes for Location, OrgUnit, and Manager are checked.

Using the above criteria on the company directory will display all the records of employees in the Administration Org Unit in Sydney..

To change the information displayed in a report, you can also use the Advanced search option.
